E++++++++++++++ Eugene G. Weldner, a well-known insurance agent, ended his life by swallowing six ounces of carbelle acid at his home, No. 5152 Morgan street, yesterday afternoon because, as he declared in an affectionate farewell to his wife, he could no longer endure sickness, failure and debt.

On a table near the body was found a note to Mrs. Weldner giving his reasons for end-ing his life The empty bottle stood upon

Weidner had been in the city early if the day and it is believed that he bought the poison then. He came home and retired to a bedroom on the second floor of his residence. Shortly after his return from town his son-in-law, Andrew Stansberry, of No. 1714 Wagoner place, and Mrs. Stansberry came to Mr. Weidner's home and took Mrs. Weidner and her son. DR. BROKAW DEFENDS X-RAYS.

Does Not Believe Sensational Chicago Stories of Deaths.

Doctor A. V. L. Brokaw does not believe the stories from Chicago to the effect that wholesale deaths are being caused these through the application of the X-rays.

Doctor Brokaw has recently returned from Chicago, and, being an ardent experimenter with the Roentgen ray, declares that he did not find any ill effects being encountered by reputable practitioners.

"I have been experimenting with the rays since 1895," he says, "and I have failed to mid that they detracted a particle from my health. Stories to the effect that the rays are harmful have been circulated by persons who have not, and never will have, any appreciation of the uses of the X-ray. The stories themselves, I am inclined to believe are gotten up by sensational writers.

"It is true the rays are harmful if the persons using them are not careful. They produce a burn which takes a long time to heal, and is caused by undue exposure to the powerful light forces. Inventor Edison, I have no doubt, has experienced considerable trouble as a result of overcaposure caused by his enthusiasm in making experiments."
